The University of Economics in Katowice

The University of Economics in Katowice is one of the oldest universities in Upper Silesia. It was founded in December 1936 and the first inauguration of the academic year took place on January 11, 1937.

It is also one of the five state universities of economics in Poland and the largest university in the region, educating nearly 10,000 students in the socio-economic sciences. The University conducts numerous research and academic projects while supporting entrepreneurship, business and the public sector.

The University is open to international and expert cooperation, creating a community based on shared values and trust, enabling equal opportunities and countering all forms of exclusion.

In 2019, Novatel Sp. z o.o. completed an order for the supply of sixty sets of Univox® SmartLoop portable reception loops, five stationary Univox® CLS-1 based Cross-the-Counter loop systems with gooseneck microphones as well as two Univox® Listener loop receivers.

The portable loops are used to efficiently serve hard-of-hearing people (mainly students) with hearings aids, wherever needed. The loop receivers (Listener) allow facility staff to regularly verify the operation of the induction loops on site.
